Version WTR.CC.V04  
Date 20.02.2009  
Page 02

### Characteristics

- Suitable for Lifts designed according to 95/16 EC Lift Directive and EN 81 Standards.
  - Dimensions according to ISO 4190 Norms.
  - Availability of Rated loads from 320 Kg to 5000 Kg.
  - High quality level of Finishings.
  - Standard or special dimensions & material availability.
  - Modular easy-to-assemble design from inside, reduced number of screws and special fixing solutions.
  - Car door alignment possibility with step of 25 mm.
  - Possibility of adapting horizontal COP for handicaps.
  - Prewiring included for lighting.
  - Reduced delivery times.
  - Easy to deliver, transport and handling.
  - Detailed assembly instructions.
  - Patented Design.
- No part of this publication may be reproduced or translated, even in part without prior written permission from Wittur Ltd. Car designs protected by the Art and Intellectual law article's.

Cityline & Specialine

#### Cityline

- $C I W$  and  $C I D$  Dimensions are changeable within limits of Car Internal Area (CIA), with steps of 50 mm.
- Maximum Car Internal Width ( $C I W$ ) can be equal to maximum Car Internal Depth ( $C I D$ ) and vice versa.
- Material specifications like colors and textures are changeable only with similar materials.

#### Specialine

- Are Produced specially according to the demands of the customers and do not exist in the standard series.
- Can be produced according to the dimensions and details within permitted limits of the standards and technological possibilities.
- Can be produced by using materials specially designed for customers or suitable to customers's own components.
